

NATURALLY INNOVATIVE

[ARNEG S.p.A.](#), holding health and safety at work to be a core value, implemented a business management system to meet the requirements of the standard, **BS OHSAS 18001**. Having successfully passed the audit, ARNEG S.p.A. has thereby obtained CSQ-H&S Certification.

This important achievement has been obtained by spreading a culture of safety throughout the organisation, by defining rules of conduct and promoting responsible behaviour, by ensuring compliance with current regulations, improving accident prevention measures and by protecting against risks at work. ARNEG S.p.A. also demands that its suppliers and contractors adopt criteria to protect the health and safety of workers in their own organisations.

BS OHSAS 18001: 2007

British Standards Institution Occupational Health and Safety Assessment Series

The 2007 version of BS OHSAS 18001 is the first internationally-recognised standard for health and safety at work.

BS OHSAS 18001:2007 specifies the requirements that a management system must meet to allow each organisation to develop and implement a policy and objectives that take into account the provisions of law as well as the information available on risks to health and safety at work. These standards give organisations the elements needed for an efficient health and safety management system which is integrated with the criteria for managing other aspects (e.g. ISO9001 and ISO14001). The general aim of BS OHSAS 18001 is to support and promote good practice in health and safety at work.
